

AI Prompt Engineering Workshop - Final Project

1. Cover Page

Name: Sumathi Gajjala
Department: CSE (AI & ML)
Project Title: AI Resume Builder

2. Project Overview

The **AI Resume Builder** is an AI-powered application designed to help users create professional, ATS-friendly resumes quickly and efficiently. Users provide details such as their education, skills, projects, certifications, and work experience, and the AI generates a well-structured resume with appropriate formatting and content. The system also suggests improvements for grammar, wording, and resume keywords to enhance the chances of getting shortlisted by employers. This project demonstrates how prompt engineering can be used to generate high-quality, personalized resumes while saving time and improving overall resume quality.

3. AI Tool Used

Tool Used: ChatGPT

4. Prompt(s) Used

Prompt 1 – Simple Prompt

Create a resume for a Computer Science Engineering student.

Difference:

This prompt is very general, so the AI generates a basic resume with standard sections.

Prompt 2 – Specific Prompt

Create a professional one-page resume for a third-year Computer Science Engineering student. Include sections for career objective, education, technical skills, academic projects, certifications, and achievements. Use a clean format and professional language.

Difference:

This prompt provides more details about the structure, content, and style, resulting in a more organized and professional resume.

Prompt 3 – Optimized Prompt

Act as an expert resume writer. Create an ATS-friendly one-page resume for a third-year Computer Science Engineering student applying for Software Developer internships. Highlight Python, Java, HTML, CSS, JavaScript, MySQL, AI projects, leadership experience, and certifications. Use strong action verbs, ATS keywords, concise bullet points, and a modern professional format to maximize recruiter impact.

Difference:

This prompt includes the target job role, ATS optimization, keywords, formatting requirements, and writing style, producing a high-quality, recruiter-friendly resume.

5.Result prompt 1

Create a resume for a Computer Science Engineering student.

If you're using this as the **AI output** for **Prompt 1**, here's a simple resume that matches the basic prompt.

Resume

Computer Science Engineering Student

Career Objective

Motivated Computer Science Engineering student with a strong interest in software development and emerging technologies. Eager to apply technical knowledge and continuously learn new skills while contributing to organizational growth.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering

RGUKT RK Valley

Currently Pursuing

Technical Skills

- Python
- Java
- C Programming
- HTML
- CSS
- JavaScript
- MySQL

Projects

- **AI Resume Builder** – Developed a simple AI-powered resume generation application.
- **Campus Trace** – Designed a lost and found platform for managing lost items.

Certifications

- Python Programming
- Introduction to Artificial Intelligence

Achievements

- Participated in AI workshops.
- Completed online technical courses.

prompt2

Create a professional one-page resume for a third-year Computer Science Engineering student. Include sections for career objective, education, technical skills, academic projects, certifications, and achievements. Use a clean format and professional language.

Resume

Computer Science Engineering Student

Email: your.email@example.com | Phone: +91-XXXXXXXXXX | LinkedIn: linkedin.com/in/yourprofile | GitHub: github.com/yourusername

Career Objective

Dedicated and enthusiastic third-year Computer Science Engineering student with a strong foundation in programming, web development, and problem-solving. Seeking an internship opportunity to apply technical skills, gain practical experience, and contribute to innovative software development projects while continuously enhancing my knowledge.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering
RGUKT RK Valley
Expected Graduation: 2028

Technical Skills

- **Programming Languages:** Python, Java, C
- **Web Technologies:** HTML, CSS, JavaScript
- **Database:** MySQL
- **Tools:** Git, VS Code
- **Core Subjects:** Data Structures, DBMS, Operating Systems, Computer Networks

Academic Projects

AI Resume Builder

- Developed an AI-powered application to generate professional and ATS-friendly resumes.
- Implemented structured resume formatting and content generation using AI.

Campus Trace

- Designed a lost-and-found platform for reporting and tracking lost items.
- Created a user-friendly interface for submitting and searching item details.

Smart Farming Assistant

- Proposed an AI-based solution for crop recommendation and plant disease detection.
- Integrated weather-based farming advice to support agricultural decision-making.

Certifications

- Python Programming Certification
- Introduction to Artificial Intelligence
- Web Development Fundamentals

Achievements

- Participated in AI Prompt Engineering Workshop.
- Completed multiple online programming and AI courses.
- Actively involved in academic mini-projects and technical learning.

Prompt3

Act as an expert resume writer. Create a one-page ATS-friendly resume for a Computer Science Engineering student applying for Software Developer and AI/ML internship roles. Highlight technical skills, AI-based projects, leadership experience, certifications, and achievements. Optimize the resume using relevant ATS keywords, improve grammar, and make the content concise, professional, and impactful.

ATS-Friendly Resume

Professional Summary

Motivated and detail-oriented Computer Science Engineering student with a strong foundation in software development, artificial intelligence, machine learning, and web technologies. Skilled in developing AI-powered applications, solving programming challenges, and building user-focused solutions. Seeking a **Software Developer** or **AI/ML Internship** to apply technical expertise, enhance problem-solving skills, and contribute to innovative technology projects.

Technical Skills

- **Programming Languages:** Python, Java, C
 - **Web Technologies:** HTML, CSS, JavaScript, Bootstrap
 - **Database:** MySQL
 - **AI & Machine Learning:** Prompt Engineering, Machine Learning Fundamentals, Data Analysis
 - **Developer Tools:** Git, GitHub, VS Code
 - **Core Subjects:** Data Structures, DBMS, Operating Systems, Computer Networks
-

Academic Projects

AI Resume Builder

- Developed an AI-powered application to generate professional, ATS-friendly resumes based on user input.
- Applied prompt engineering techniques to improve resume quality and content generation.
- Enhanced resume formatting, grammar, and keyword optimization for better ATS compatibility.

Campus Trace – Lost & Found Platform

- Designed a web-based platform for reporting and tracking lost and found items within a campus.
- Implemented an intuitive interface to simplify item search and reporting.

AI Smart Farming Assistant

- Built an AI-based solution for crop recommendation, plant disease detection, and weather-based farming guidance.
 - Improved decision-making by integrating intelligent agricultural recommendations.
-

Leadership & Responsibilities

Leadership & Responsibilities

- Event Coordinator – **Aarohana 2K26**
 - Active participant in technical workshops, hackathons, and AI learning programs.
 - Collaborated effectively in team-based academic projects and presentations.
-

Certifications

- Python Programming
 - Artificial Intelligence Fundamentals
 - Web Development Fundamentals
 - AI Prompt Engineering Workshop
-

Achievements

- Developed multiple AI and web-based academic projects.
- Strengthened problem-solving skills through coding practice and project development.
- Continuously learning AI, Machine Learning, and Full-Stack Development technologies.

6. Learning Reflection

- I learned how AI can generate professional, well-structured resumes quickly by using the right prompts and relevant information.
- ChatGPT was the AI tool I liked the most because it provided accurate, easy-to-understand, and high-quality resume content in a short time.
- I understood that prompt engineering plays a key role in improving AI responses. More specific and detailed prompts produced more professional and ATS-friendly resumes.
- I learned how to refine prompts by adding context, formatting requirements, and target job roles to obtain better results.
- This project enhanced my understanding of AI-assisted content generation and showed how AI can save time while creating professional documents.
